

1. Add patient

1 Add patient

- Click the left hand menu link [Add patient] to add a new patient to the system.
- First answer two questions regarding diagnosis and treatment: if the patient is diagnosed with acromegaly and if the patient is using Somavert or is a candidate for Somavert treatment.

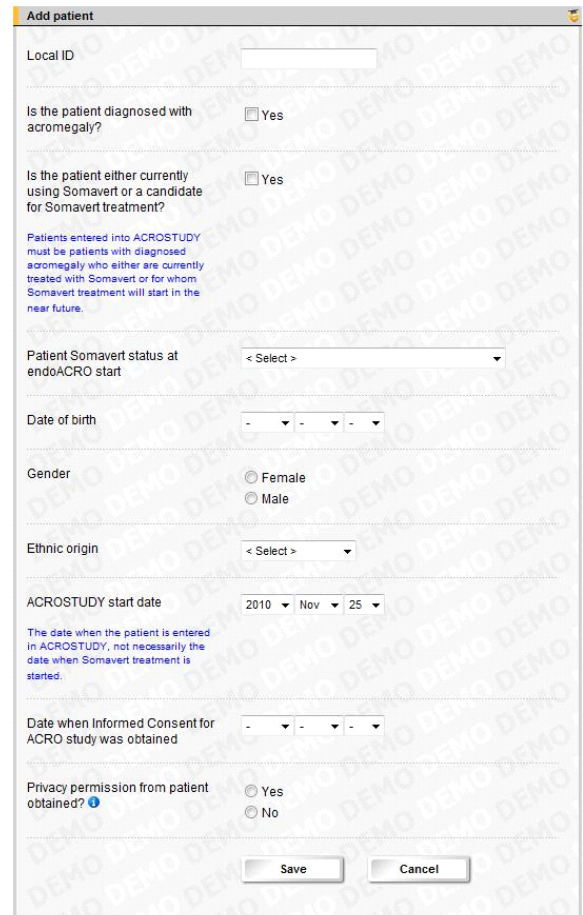

Patients entered into ACROSTUDY must be patients with diagnosed acromegaly who are either currently treated with Somavert or for whom Somavert treatment will start in the near future.

The screenshot shows the VIEDOC interface. On the left, a navigation menu has 'Add patient' circled in red. The main area displays a 'Welcome Dr Test!' message, a search bar for ACROSTUDY ID and Birth date, and a 'Status' bar chart showing patient counts for Active, Non-active, and Dead categories.

2 Add patient details

- All patient details must be filled in before the patient can be added.
- Remember to sign the patient card once you have saved the new patient. Read more about signing in the "Sign data" lesson.
- View the status of the patient card on the Choose patient page using the study status view option.

The 'Add patient' form contains the following fields and options:

- Local ID: [Text input field]
- Is the patient diagnosed with acromegaly? Yes
- Is the patient either currently using Somavert or a candidate for Somavert treatment? Yes
- Patients entered into ACROSTUDY must be patients with diagnosed acromegaly who either are currently treated with Somavert or for whom Somavert treatment will start in the near future.
- Patient Somavert status at endoACRO start: < Select >
- Date of birth: [Month] [Day] [Year]
- Gender: Female Male
- Ethnic origin: < Select >
- ACROSTUDY start date: 2010 [Month] [Day]
- The date when the patient is entered in ACROSTUDY, not necessarily the date when Somavert treatment is started.
- Date when Informed Consent for ACRO study was obtained: [Month] [Day] [Year]
- Privacy permission from patient obtained? Yes No
- Buttons: Save, Cancel
